## USED FOR:

- New Employee Onboarding
- Leadership Development
- Sales & Product Training
- Compliance Training
- So Much More!

# Game Library + Authoring Tool + Analytics Dashboard

**The Training Arcade® turns passive training into active learning & drives greater ROI.**

### Grab Learners' Attention

The games are fun, polished, engaging experiences, and easy to pick up and play.

### Teach and Reinforce Key Information

Built by game designers and instructional designers together, this blend of fun and brains ensures that content is more effectively taught, tried, and tested.

### Sustain Their Focus

All games offer a practice playground in which players willingly and repeatedly engage with learning content, resulting in a positive emotional connection.

### Provide Actionable Insights

Identify what players have learned and how they have behaved to learn about corrective action required at the individual and group levels.

**THE TRAINING ARCADE®** PROVIDES A VARIETY OF GAME TYPES THAT MAP TO DIFFERENT LEARNERS, LEARNING ENVIRONMENTS, SKILLSETS, & CONTENT.

## 10 GAMES AVAILABLE

**Jeopardy!®, Jump, Scramble, Sort-It, Wheel of Fortune®, Trivia, Scenarios, Match, Recall, and Detective.**

### JEOPARDY!®

The official **Jeopardy!**® for Training game, created in partnership with Jeopardy Productions, follows the classic rules of America's Favorite Quiz Show®. Each game features Jeopardy!®, Double Jeopardy!®, and Final Jeopardy!®, and "Daily Doubles." Build the game in single player mode or Instructor Mode for a live learning active game experience.

### JUMP

In this high-adrenaline training game, players earn points and extra lives by jumping from platform to platform and answering questions along the way!

### SCRAMBLE

Scramble is a word puzzle that includes two modes: Word Scramble or Sentence Scramble. Players must unscramble the word or sentence from the clues provided before the timer runs out.

### SORT-IT

Sort-It is a grid game that takes into account multi-levels of thinking. Players are presented with different categories in rows and columns along with a bank of content that needs to be correctly dropped into the appropriate rows and columns to complete the grid.

### WHEEL OF FORTUNE® (NEW!)

Infusing all the energy, excitement, and gameplay of the #1 syndicated TV show in television history, Wheel of Fortune for training and education will feature 3 puzzle mechanics (regular, toss-up, and bonus rounds). Game creators can decide the number of puzzle rounds, time per round, and a host of other puzzle details. This game places a premium on the fast retrieval of concepts, terminology, facts, and figures required for job performance.

### TRIVIA

Trivia transforms quizzes and assessments into an engaging, fun and competitive game with points, streaks, leaderboards, and timers. It's ideal for boosting engagement and retention and rewarding learners for fast and correct decision making.

### SCENARIOS

Scenarios is the perfect game for any soft skills training (sales, customer service, negotiations, management, etc.) putting players into real life situations where they need to make decisions and based on their choices, they are sent down different branching paths. Add in live action video, images, animation, or audio files to bring the game to life with your own content, Use visual meters to help learners gauge their success along the way.

### MATCH

Match is a fast-paced game in which players swap tiles on the game-board to create identical combinations of three or more. Addictive and high energy, with Q&A woven throughout gameplay, Match encourages players to return often to master their score.

### RECALL

Recall is a great game for visual learning, memorization, step by step processes, and identification. Players view an image or video that quickly disappears and are then challenged with recalling what they just saw. All pictures, videos, and questions are customizable.

### DETECTIVE

Detective is a highly engaging, interactive game that allows the learner to hone their judgement, problem-solving and cognitive processing skills. Players are presented with a list of Suspects and Case Studies containing several pieces of evidence. The learner then needs to assess and connect multiple points of information in order to assign pieces of evidence to the corresponding suspects, ultimately leading them to the final conclusion.
